JETBOIL®

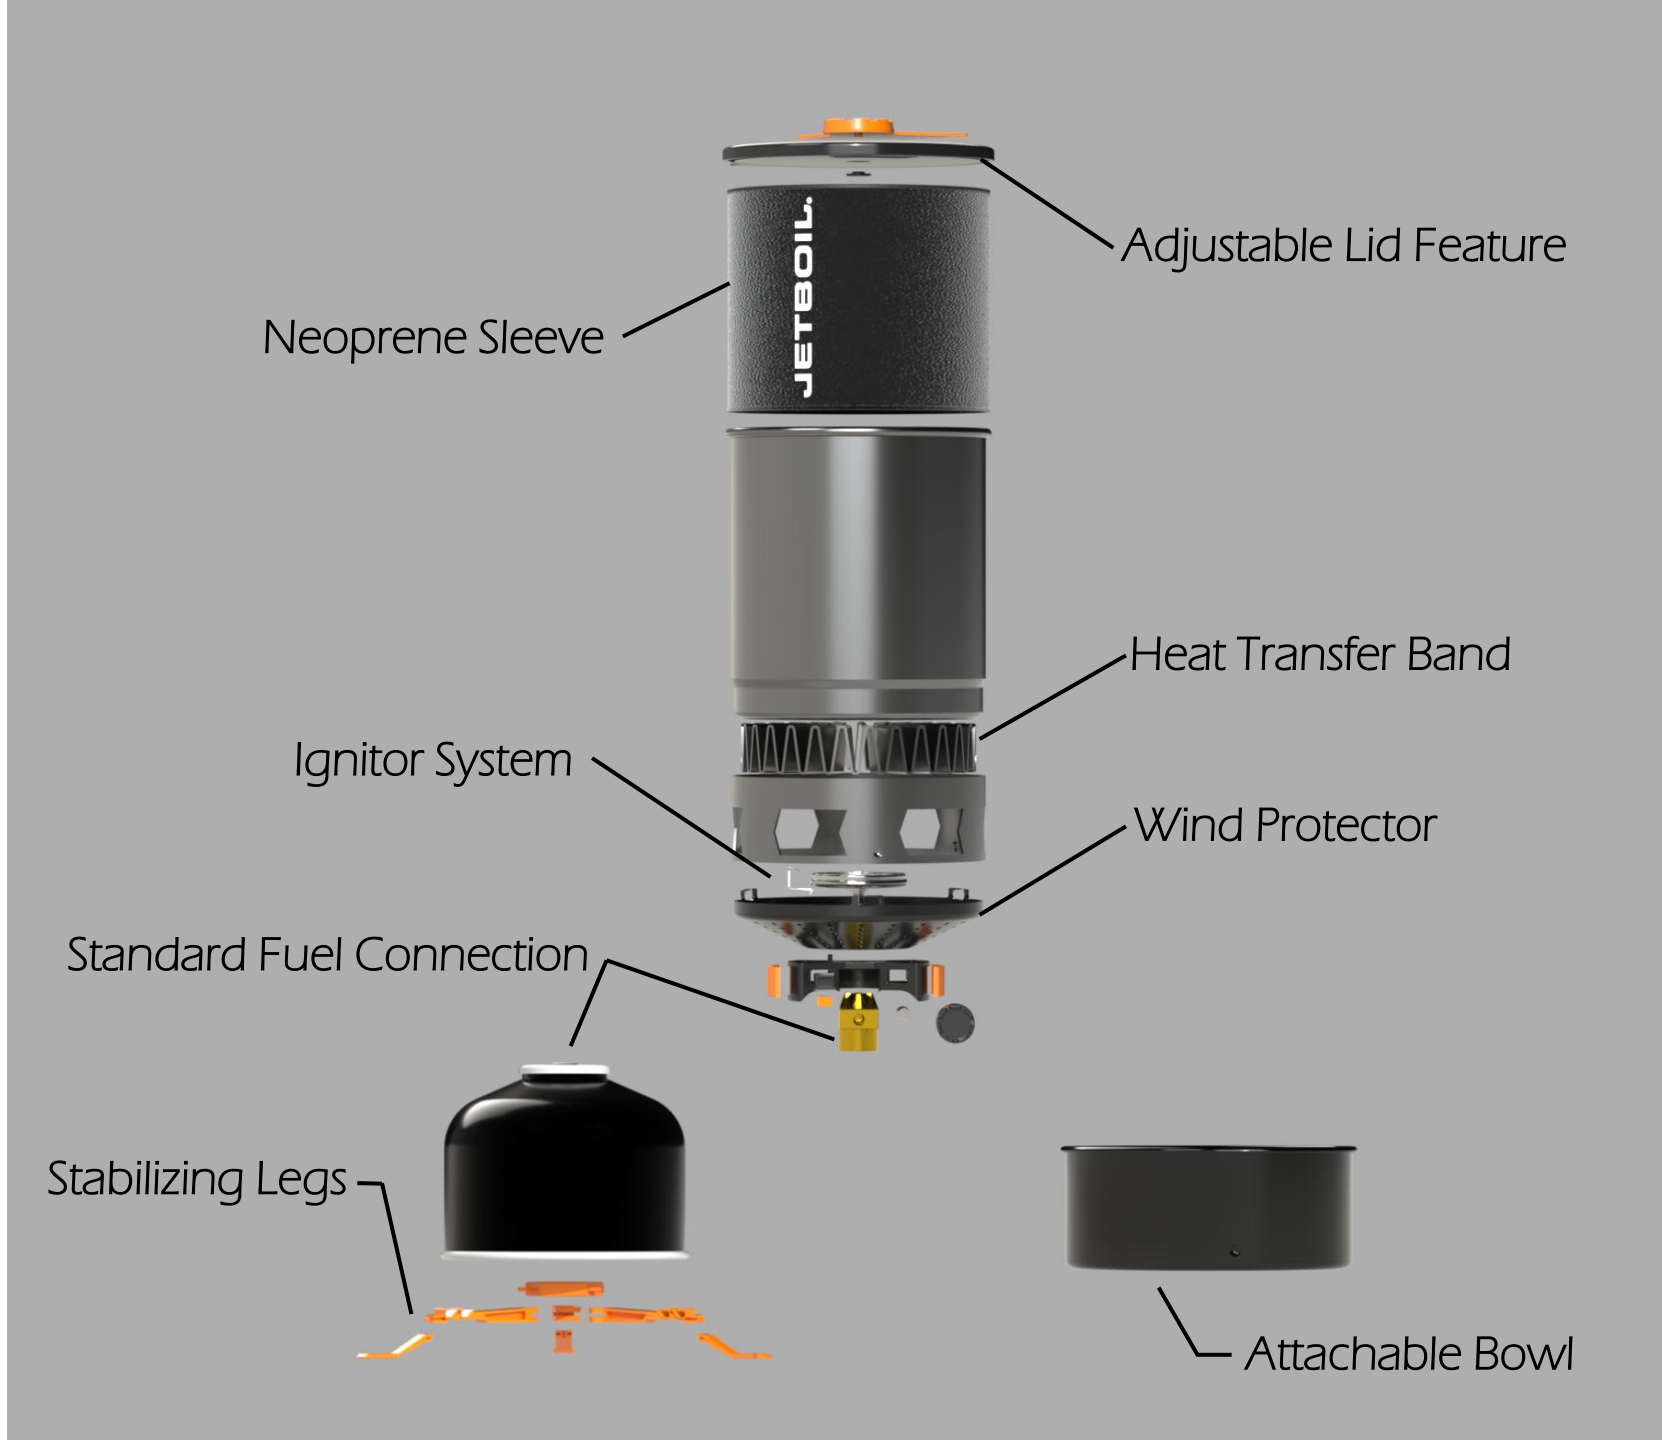

Developed the Next Generation Design
for the JetBoil Zip 0.8L Camping Stove

Design Requirements:

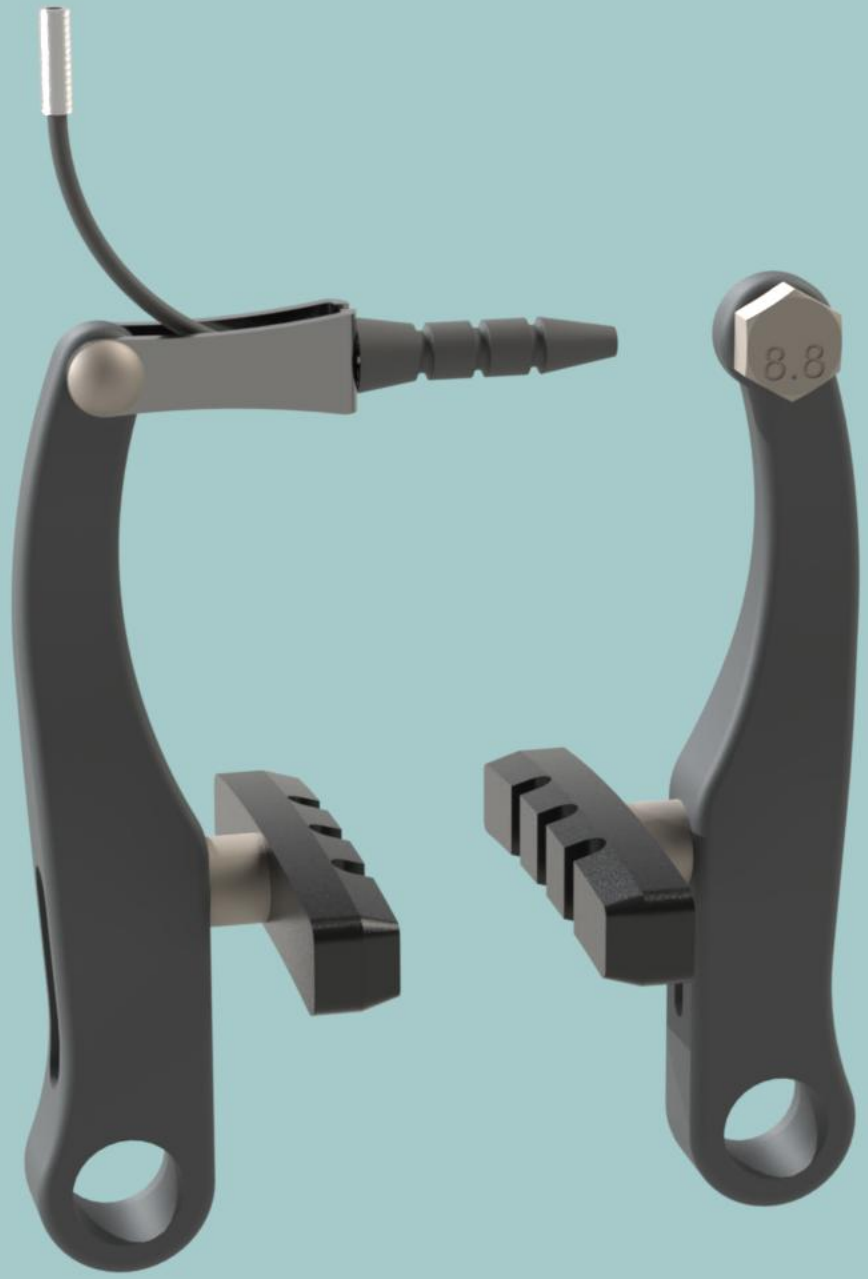

- Full assembly weighs less than 0.75 lbs (excluding the fuel canister).
- All parts must fit into the JetBoil pot.
- Design must be compatible with standard fuel canisters.
- The quality of the design represents the JetBoil standard.

V-BRAKE

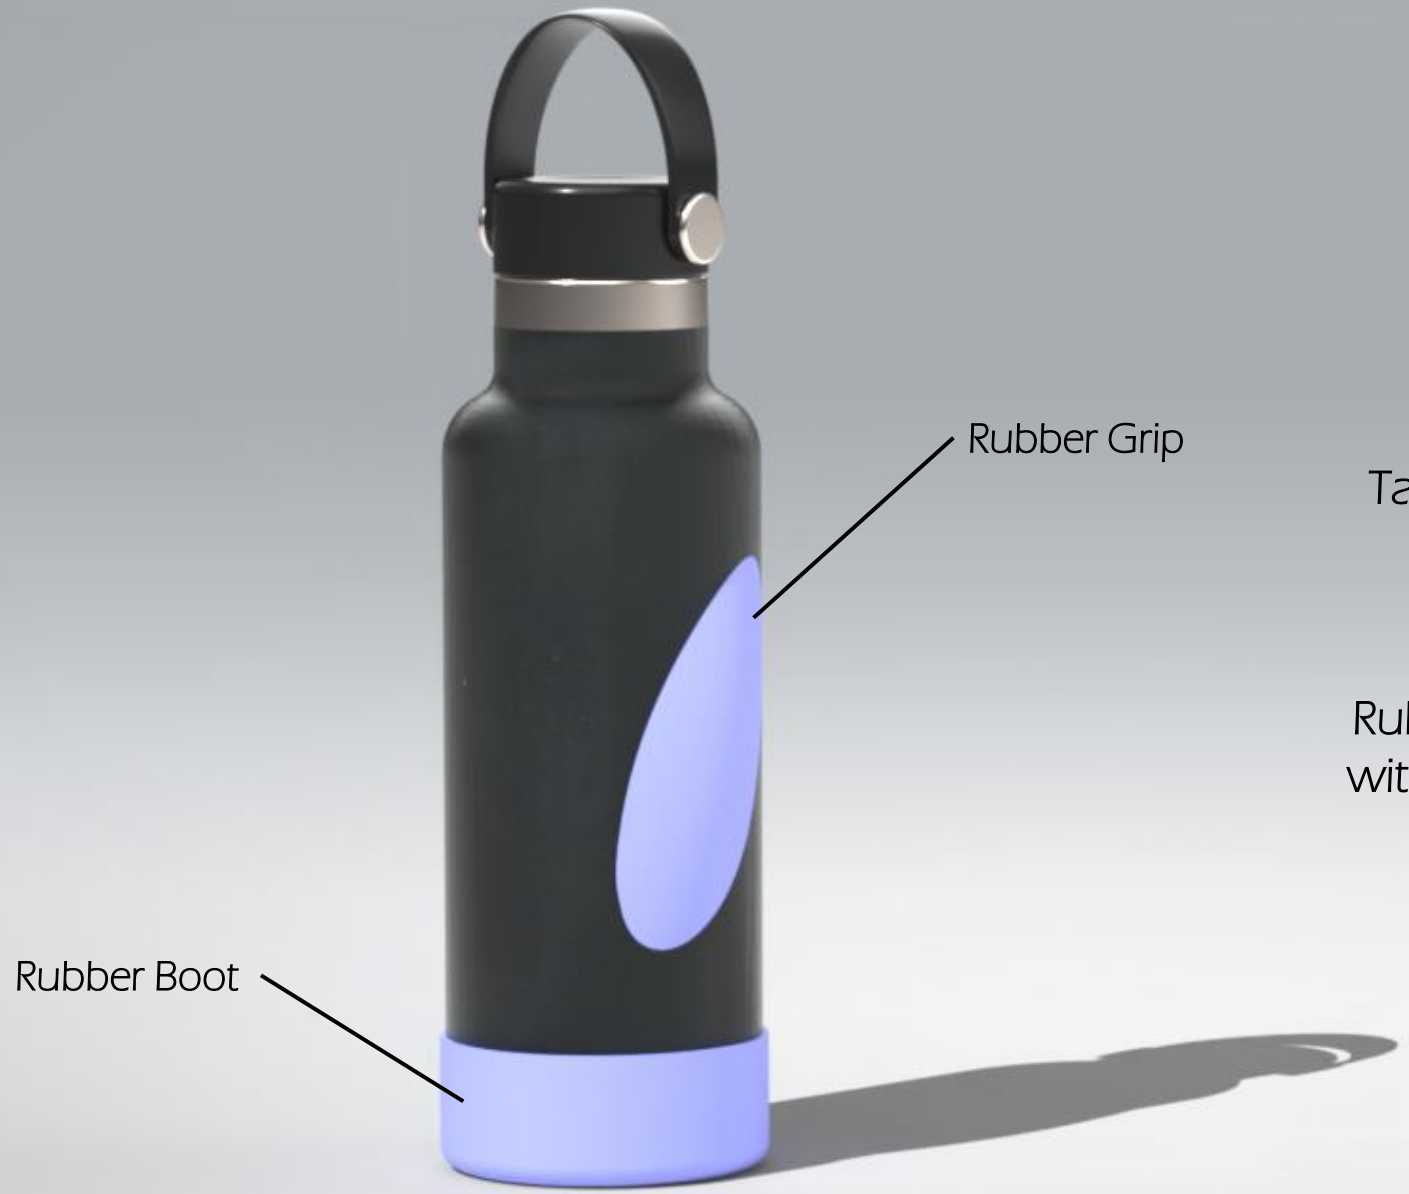

SolidWorks model based on engineering drawings under a 3-hour time constraint.

Modeling techniques include solid body extrudes, cuts, revolves and sweeps.

William Waddoups

Hydro Flask

Tasked with modeling a Hydro Flask bottle in SolidWorks.

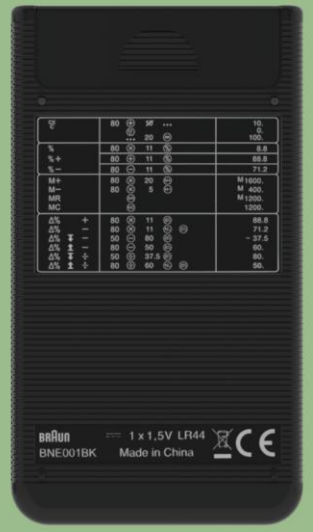

Rubber Grip and Boot were designed with Master Modeling. Design process shown on the following page.
